

# Introducing Read&Write...

## What is Read&Write?

Read&Write is a discreet toolbar which can help you to consume course content easier and write coursework more effectively. It integrates seamlessly with the computer applications you already use to study, like web browsers and Microsoft or Google applications. So, you can also benefit from the toolbar's features as you carry out research across the web, organising content as you go.

Organise your research and references

Listen to course content on your phone

Convert textbooks to accessible digital documents

# Diverse features suiting any learning style

All students learn in different ways. You may be an auditory processor, who likes listening to information rather than reading. Or perhaps you like to plan visually and use mind-maps. You might even like to stick to paper or digital note-taking.

Whichever your preferred learning style, Read&Write can help you to study smarter when you're revising and writing assignments, coursework or dissertations.

**Text-to-speech:** Proofread more effectively by hearing your work read back to you.

**Word prediction:** Predictive text boosts writing efficiency. Subject related word banks available.

**Audio maker:** Convert course text into audio files to listen and learn on the go.

**Highlights:** Organise research and compile references in a bibliography at the click of a button.

**Scan:** Convert inaccessible hard copy texts into accessible PDFs, Microsoft Word documents, EPUB and HTML formats.
