## Quick Reference Guide

### Hover to speak

Reads on-screen text out loud, with read along highlighting, when text is clicked on or hovered over.

#### Benefit

Hearing text read out loud reinforces understanding. It also helps to increase focus and improve retention.

### Play

Select specific text to have it read out loud. It will only read the selected text.

#### Benefit

Helps users to skim read the page instead of hearing it all read aloud.

### Pause, Stop

Stop reading the page altogether or pause reading and resume when you're ready.

#### Benefit

Gives users full control of the audio.

### Translation

Instantly translates web pages into 100+ languages. And, reads the translation in 40 of the most commonly spoken languages.

#### Benefit

Allowing your visitors to read and listen to web pages in their preferred or native language helps with understanding and navigation.

### Picture Dictionary

Provides a visual description of any word on your website.

#### Benefit

Gives visitors an alternative way of understanding written words. The use of images can remove barriers that make reading and hearing text difficult.

### MP3 Maker

Converts online content into an MP3 audio version.

#### Benefit

Listening to lengthy web or PDF reports instead of reading them can often save time and eye strain. It also gives a choice for people who prefer to listen to words rather than read them.

### Screen Masking

Tints a user's whole screen with a screen mask of any color, size and opacity. Users can also add a reading pane that will move along with their mouse pointer.

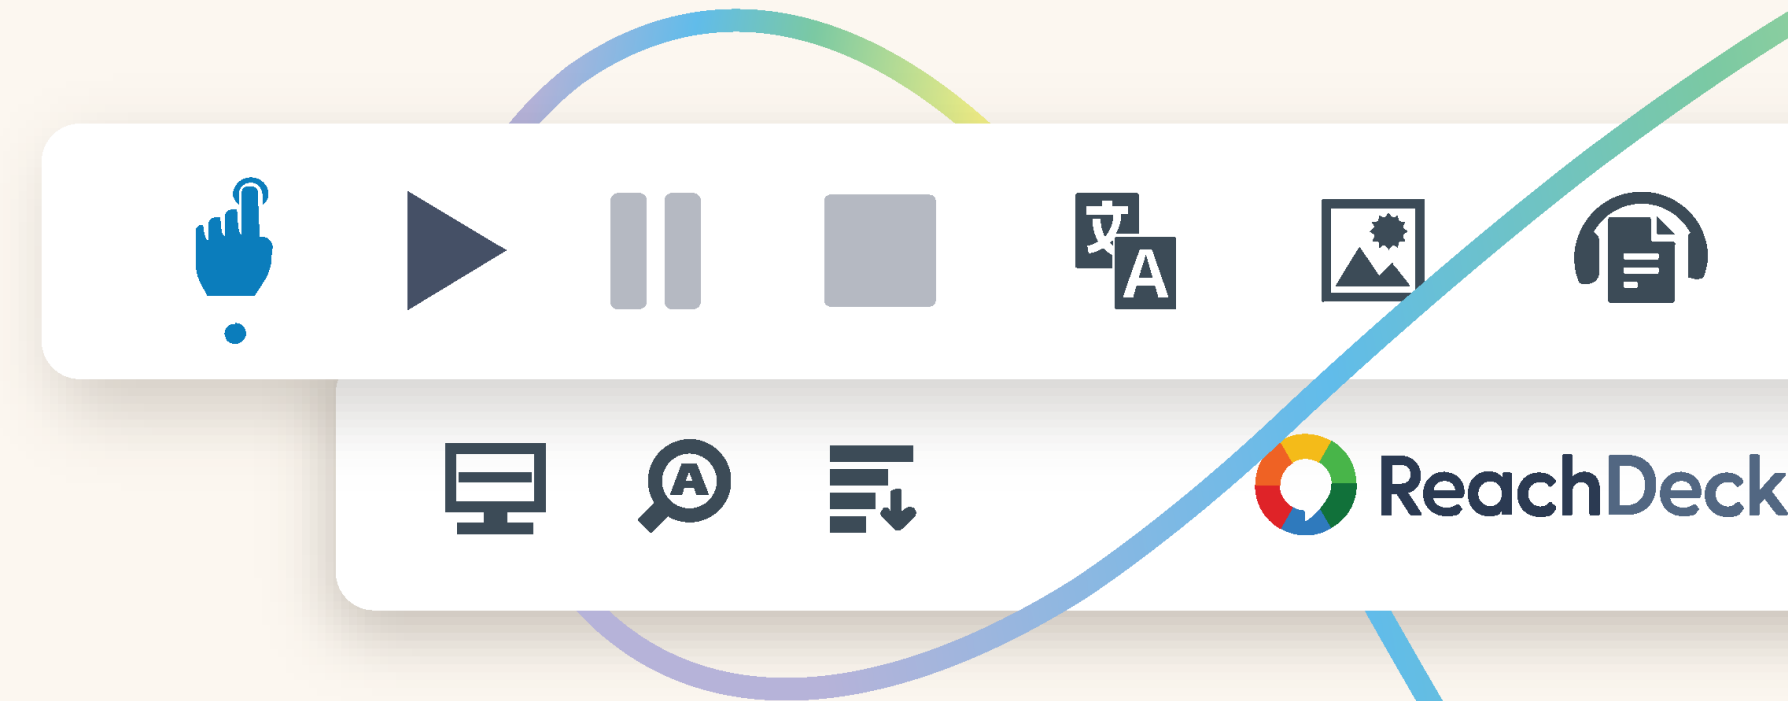

#### Benefit

Helps to reduce screen glare and increase focus. Also benefits people with color or light sensitivity and cognitive load difficulties.

## Quick Reference Guide

### Text Magnifier

Magnifies text and reads it out loud. The magnified text is displayed in a single line at the top of the screen. Each word highlighted as it's read aloud.

### Benefit

Increases the accessibility of even the smallest web text. This is especially helpful for people with low vision.

### Web Page Simplifier

Removes distracting content like images and flashing adverts from the main body text. The text can be summarized and the font size and colors changed.

### Benefit

Helps to increase focus and makes processing of web content easier.

### Settings

Allows users to personalize the toolbar. They can change the colors, voice speed, screen mask options, text size when magnified and more.

### Benefit

An adjustable toolbar helps you to better support your diverse audience.

To add the ReachDeck Toolbar to your website, follow our [step-by-step instructions](#).
