

## EquatIO - Extension Activity 1 'Scavenger Hunt'

Let's get you even more skilled at using EquatIO - take part in our Scavenger Hunt and complete as many tasks as you can in 30 minutes!

To get started, download the list of tasks as in the Scavenger Hunt and use it as a template to complete each task and show it as completed.

Section 1 - maths input - 1 point each		Done?	Points
1	Create a fraction using prediction or keyboard shortcuts.		
2	Create a square root using prediction		
3	Edit some math you already inserted and insert it back in.		
4	Create a fraction with a sum of 2 terms in the numerator by selecting it first.		
5	Create a cube root (or higher root) with prediction.		
6	Create a term that is squared with prediction.		
7	Create text and math in the same entry with prediction.		
8	Create a term with a variable in the superscript (power) using prediction or keyboard shortcuts.		
Task 2 - 2 points each			
9	Create the quadratic formula with prediction.		
10	Create some Chemistry notation with prediction		
11	Create an equation and then create another line below it with the next step.		
12	Create an equation from speech input.		
13	Create some math with handwriting recognition.		

14	Create a graph with prediction		
15	Create some math with EquatIO Mobile and insert.		
16	Create some math from a screenshot from another webpage		

Task 3 - 3 points each			
1	Align 2 lines of math by the equal sign		
2	Create a 3 by 3 matrix		
3	Import a Desmos graph from <a href="https://desmos.com/calculator">desmos.com/calculator</a>		
4	Create some math in EquatIO mathspace ( <a href="https://equat.io">equat.io</a> ), download as png, insert png into Slide
