

Quick Reference Guide for Tool Usage

Tool	What each tool does	How to make the tool work
<p>Scan</p> 	<p>Scan inaccessible text, converting it into accessible text that can be read aloud, copied, edited, and so on.</p> <p>Inaccessible text can mean a paper document, a PDF, an image file, or an area of text on your screen.</p> <p>For example, you might have a scanned PDF where you cannot select text, or a photo of some text, or an image on a website. You can read all of these using the scan tool.</p>	<p>To scan a paper document, click [Scan] and then [Scan from Paper]. Follow the instructions to scan your document. If you have not used your scanner with ClaroRead before, ClaroRead will help you to set it up first.</p> <p>To scan a PDF or other file, click [Scan] and then [Scan from PDF/File]. Select your file and then follow the instructions to scan it into accessible text.</p> <p>To scan part of your screen, click [Scan] and then [Scan from Screen]. Click and drag to select an area of your screen, which ClaroRead will then scan and copy to the clipboard. If ClaroRead does not read out the text automatically, click [Play] to read it aloud.</p>
<p>Speech</p>  	<p>Reads text aloud using a clear high quality voice.</p> <p>You can choose from a range of options, including different voices, reading speed, and highlight colour.</p>	<p>In Microsoft Word, click [Play] (or press F7) to start reading aloud from the current cursor position, with highlighting. Other applications that work this way include Outlook, PowerPoint, and Adobe Acrobat.</p> <p>In most other applications, you must select the text you want to read before clicking [Play].</p> <p>In all applications, click [Stop] (or press F8) to stop reading.</p> <p>Note that ClaroRead also has mechanisms for reading text aloud automatically, e.g. after you type a word, or when you select text using the mouse.</p> <p>To change reading settings, including voice and speed, click [Settings] and open the Speech tab.</p>
<p>Dictate</p> 	<p>Turns spoken words into text (text-to-speech).</p>	<p>Click [Dictate] when you are ready to speak.</p> <p>Dictate what you wish and the system will turn your speech into text.</p>

<p>Font*</p> 	<p>Allows you to quickly change the font, font size and font colour in a Word document.</p>	<p>Click [Font] and select the option you wish to use.</p> <p>If you have text selected, the option will be applied to the selected text only. Otherwise, it will be applied to the whole Word document.</p>
<p>Spacing*</p> 	<p>Allows you to quickly change the spacing between characters, lines and paragraphs in a Word document.</p>	<p>Click [Spacing] and select the option you wish to use.</p> <p>If you have text selected, the option will be applied to the selected text only. Otherwise, it will be applied to the whole Word document.</p>
<p>Check</p> 	<p>Checks text for spelling mistakes and provides suggested corrections, synonyms and dictionary definitions.</p>	<p>In Word, click a word and then click [Check] to open ClaroRead's Check window.</p> <p>The Check window contains suggestions, synonyms, and dictionary definitions for the current word. To make a correction, select a suggestion (or a synonym) and then click Change.</p> <p>In other applications, select text then click [Check]. ClaroRead checks the text and opens the Check window for any words that are incorrect.</p>
<p>Homophones</p> 	<p>Checks text for same sounding words (homophones).</p>	<p>Click [Homophones] and then select Check Homophones to check homophones from the current cursor position (Word) or in the selected text (other applications). This gives your text a thorough check, opening the Check window for any possible errors.</p> <p>In Word, you can click and then select Show Homophones to highlight all homophones in the current paragraph (or the selected text).</p>
<p>Predict*</p> 	<p>Provides word suggestions as you type and helps construct error-free sentences more easily.</p>	<p>Click [Predict] to turn word prediction on and off.</p> <p>When you start typing, ClaroRead shows the most likely next words in a small window, with pictures if available.</p> <p>To insert a suggested word, either click on it or press the corresponding function key (F1 to F5).</p>
<p>Save</p> 	<p>Converts text you select or copy into an audio file which will be automatically downloaded to where you choose.</p>	<p>Highlight or copy the text you want to save as your audio file.</p> <p>Click [Save] and the Save As window appears. Choose where you wish to save the audio file and which file format you wish to use, then click Save.</p>
<p>Extras</p> 	<p>Links to other Claro Software applications and utilities that you have installed.</p>	<p>Click [Extras] and choose an application from the menu.</p> <p>For example, select ClaroView or ScreenRuler to tint or mask your screen, or ClaroCapture to capture text and images from different locations.</p> <p>You can configure the Extras menu to include links to handy web pages or other applications.</p>

<p>Settings</p> 	<p>Opens the Settings window, which enables you to configure ClaroRead to work best for you.</p>	<p>Click [Settings] and choose a tab to access those settings.</p> <p>For example, the Speech tab controls how and when ClaroRead reads out text, while the View tab controls which buttons are shown on the toolbar.</p>
<p>Help</p> 	<p>Easy access to Help.</p>	<p>Click [Help] to open the ClaroRead help system.</p>
<p>Undock</p> 	<p>Undocks the toolbar from the top of your screen.</p>	<p>Click [Undock] to undock the toolbar. You can then drag it to a new position on your screen.</p> <p>This button only appears when your toolbar is docked to the top of the screen.</p>
<p>Close</p> 	<p>Closes ClaroRead completely.</p>	<p>Click [Close] to close ClaroRead.</p> <p>Note that you can hide the toolbar temporarily using its Minimise button or the Pause key.</p>
